PROFESSIONAL SUMMARY

Full-stack developer building web applications with React, Next.js, TypeScript, Node.js and SQL. Experienced in role-based access, server-side business rules, REST APIs and automated testing, with live projects in e-commerce, healthcare and digital invitations. Currently a Junior Full-Stack Developer at VisionOne.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, HTML, CSS

Frameworks: React, Next.js, Node.js, Express.js, Tailwind CSS

Databases & Tools: PostgreSQL, MySQL, Prisma, Sequelize, Git, GitHub, Docker, Postman, Jira

Engineering: REST APIs, Authentication (JWT, Better Auth), Testing (Jest, Vitest, Playwright), CI/CD (GitHub Actions)

PROFESSIONAL EXPERIENCE

Junior Full-Stack Developer | **VisionOne** (Remote) | Nov 2026 - Present

- Build digital invitations in Next.js for weddings, birthdays and other events, with features tailored to each event.
- Develop the host dashboard for following RSVPs, managing guests and updating event details.

Technical & Web Development Intern | **TechTalks** | Jun - Jul 2026

- On Agorys, a team-built analytics platform (Next.js, Express, Prisma, PostgreSQL), built the login, registration and email verification flows.
- Implemented the dataset management API and the recommendation criteria service.
- Added the backend test suite with Vitest and end-to-end tests with Playwright for auth, datasets and analytics.

Freelance Full-Stack Developer | **Private client** (generator business) | 2026

- Built a billing system for subscribers, meter readings, bills and payments with React, Node.js, Express and MySQL.

IT Department Trainee | **NINI Hospital** | 2025

- Supported troubleshooting of software and user issues, working with hospital information systems and IT staff.

PROJECTS

Veloura | Beauty E-commerce Store | Next.js, TypeScript, PostgreSQL, Prisma

- Built a store with 59 products, shade-level stock, cash-on-delivery checkout, accounts and an admin dashboard.
- Priced every order on the server and took stock in one transaction, preventing overselling and price tampering.
- Wrote 166 automated tests (unit, integration and end-to-end) that run in CI on every push.

SmartCare | Hospital Management System | React, Node.js, Express, MySQL

- Built 4 role portals (patients, doctors, front desk, administration) with permissions enforced by the API.
- Prevented double booking by checking and saving each slot in one transaction with row locks.
- Wrote 102 backend tests against a real MySQL database, run in CI on every pull request.
  Links: Live Demo | Source Code | Case Study

Rami & Lea | Digital Wedding Invitation | Next.js, TypeScript, Canvas

- Built a tap-to-open envelope invitation with a private link per guest for their name, language and seats.
- Kept each invitation's content in one data file, with English and Arabic and a WhatsApp link preview.
